Introducing the Industry's Only Owner-Maintained, Multi-Purpose, Rechargeable, Dry Chemical Fire Extinguisher.

Owner-Maintained reduces costs by eliminating third-party service requirements*; hydrostatic pressure testing, and other periodic internal inspections.

Universal Design is easy for a left or right-handed person to operate, saving time when seconds count.

Non-Pressurized design is more reliable and safer than stored pressure extinguishers.

Engineered Polymer construction is corrosion-proof, resists impacts, and is 100% recyclable for sustainability.

High Efficiency valve and nozzle assembly improve agent discharge, knocking down fire faster and giving the user more protection.

Patented RUSOH[®] Fluffing Wheel prevents compaction of extinguishing agent.

Recharge Kit (sold separately) has everything you need to recharge your Rusoh[®] Eliminator[®] fire extinguisher in minutes and put it back into service.

*Some states may require additional maintenance/licensing. Contact your sales representative and/or local fire official for more information.
